Double DockingStation

The Dual Type-C™ Notebook DockingStation is designed for extra connectivity demands of a MacBook Pro® or MacBook Air®. It extends the Dual Thunderbolt™ 3 Type-C™ interface to one Thunderbolt™ 3 device or power supply (pass through), one HDMI® display, two Type-A peripherals, one LAN interface, SD and microSD cards. There is no need to install extra drivers, just Plug & Play. And you can even charge your notebook by inserting your notebook's power adapter into the Type-C™ interface.

ICY BOX IB-DK4039a-2C Dual USB Type-C™ notebook DockingStation

A bit of everything

The two Type-C™ input ports of the MacBook Pro® are transferred into our DockingStation where one can be used as intended. Additionally the DockingStation gives further options to connect external devices with one HDMI® port, one LAN port, two USB 3.0 Type-A ports and two card reader slots.

High speed

Thunderbolt™ 3 offers high speed connections and versatility. It has twice the bandwidth of Thunderbolt™ 2 and combines data transmission, video output and power in a single, compact port. With the integration of USB Type-C™, the fast Thunderbolt™ 3 port has become even more practical with a physical feature that features a twist-proof USB Type-C™ port, making it truly universal.

Perfect addition

The DockingStation uses two Type-C™ ports on your MacBook Pro® to connect additional external devices. The slim, minimalist design with aluminum finish complements the new MacBook Pro® perfectly. And once you're done, you can slip the DockingStation into the included leatherette pouch to store it or take it with you.
